Meanwhile, BAM Trading services is **FiCEN** registered. On the other hand, Kai Trading has links to the former Senior Director of Engineering at Hubo Global, Hao Chen. In turn, Chen is the CEO of Kai Trading, who lists Binance as one of their investors. Chen was part of the team that launched **Hubo US**. Perhaps because of his experience, Binance is now seeking his services as they plan to roll out the new platform most likely without Binance Coin (BNB).

Technical Indicators

As aforementioned, June 14 bear bar anchors this trade plan. Asset from being wide-ranged, it has high trading volumes of 4.9 million against 2.7 million. Therefore, any break and close above \$38 or fall below \$29 must be with high participation surpassing 4.5 million. That will confirm or nullify this trade plan's stance.

Binance Coin (BNB) Likely To Retrace In Days Ahead, Capped at \$38

Binance Coin (BNB) steady. The road to compliance demands aligning with regulators' needs.

The loss of US clients is a blow to Binance and BNB. However, the decision will be beneficial in the long term as Binance restructure, leaning towards regulatory compliance. From the chart, BNB is stable. Nonetheless, it is the second worst performing digital asset in the top 10.
